

Physical Activity Readiness Questionnaire (PAR-Q)

(a questionnaire for people aged 15 - 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the PARQ will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly: check YES or NO.

1. Has your doctor ever said that you have a heart condition <u>and</u> that you should only do physical activity recommended by a doctor?		
2. Do you feel pain in your chest when you do physical activity?		
3. In the past month, have you had chest pain when you were not doing physical activity?		
4. Do you lose your balance because of dizziness or do you ever lose consciousness?		
5. Do you have a bone or joint problem (for example, back, knee or hip) that could be made worse by a change in your physical activity?		
6. Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart conditions?		
7. Do you know of any other reason why you should not do physical activity?		

If you answered YES to one or more questions:

Talk with your doctor by phone or in person **BEFORE** you start becoming much more physically active or **BEFORE** you have a fitness appraisal. Tell your doctor about the PARQ and which questions you answered YES.

- you may be able to do any activity you want as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice

If you answered NO to all questions:

If you answered NO honestly to all PARQ questions, you can be reasonably sure that you can:

- start becoming much more physically active begin slowly and build up gradually. This is the safest and easiest way to go
- take part in a fitness appraisal this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/94, talk with your doctor before you start becoming much more physically active

DELAY BECOMING MUCH MORE ACTIVE:

if you are not feeling well because of a temporary illness such as a cold or a fever wait until you feel better; or

if you are or may be pregnant talk to your doctor before you start becoming more active

PLEASE NOTE: If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

NO CHANGES PERMITTED. YOU ARE ENCOURAGED TO PRINT/PHOTOCOPY THE PARQ BUT ONLY IF YOU USE THE ENTIRE FORM.

I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction.
